

outstanding achievements every day

From a young mom with a family history of breast cancer to a grandfather living with prostate cancer, great achievements happen every day at United Hospital.

Together with Minnesota Oncology and Hematology, PA, we celebrate being among the top nine percent of cancer programs in the nation to receive the 2007 Outstanding Achievement Award from the Commission on Cancer.

In recognition for their unwavering commitment to our patients, this honor is dedicated to our physicians, nurses and staff - because everything they do is in the pursuit of a single goal: your total well-being.
