

Transitional Rehabilitation Program

This nationally recognized program is a 48-bed licensed skilled nursing facility (SNF) that has served people with disabilities since 1976. The program has grown into one of the leading specialized, sub-acute, inpatient rehabilitation facilities in the country. It serves as a bridge to assist individuals who require intensive specialized neurological rehabilitation in transitioning between acute care and return home or alternative community living setting. Provides holistic, comprehensive rehabilitation services to adults recovering from neurological conditions caused by illness or injury.

Diagnosis breakdown of participants in 2023

A unique community service offering:

- 2 to 3+ hours of daily therapy, 5-6 days a week
