

What You Need to Know about Visiting a TRP Client

1. Visitors are required to adhere to infection prevention and control safety practices to enter the setting for visitation. Visitors who choose not to follow infection prevention and control safety practices may be asked not to visit.
2. Visitor education will include signs and symptoms of COVID-19, infection control precautions, risks associated with physical contact, and risks associated with visiting during an outbreak investigation.
3. Entry Screening: All visitors will be screened when entering the facility for signs and symptoms of COVID-19, including a temperature reading, at a screening station prior to the visitor walking through the facility.
4. Visitor Sign-in: All visitors are asked to sign in upon arrival to the facility. Visitors are asked to leave contact information when they sign in.
5. Hand Hygiene: Visitors will perform hand hygiene before walking through the building. Alcohol-based hand rub is available for persons visiting clients and signage is present throughout the facility for hand hygiene.
6. Facemask Required: Clients must remain masked as tolerated. Visitors must always wear a mask.
7. Limited Visitor Movement in Building: Visitors must use the TRP Entrance and limit their movement in the facility, taking a direct path to and from their destination. The facility has chosen to make a compassionate exception to this requirement to allow visitors to use the bathroom.
8. Visitation Schedule:
 - The Client Council has established quiet hours of 9pm to 8am, ensuring adequate rest to effectively support rehabilitation. Visitors are asked to respect the voice of the clients by not visiting during quiet hours.
 - Because clients are here for rehabilitation, we encourage visitors to come when therapy and meals are not happening: weekends and evenings except the noon and 5pm hours.
9. The facility recommends that visits occur outdoors whenever possible. Indoor visits may occur in the client's room or in the Creekside Lounge.
10. Social Distancing: All visitors **must** maintain a 6 foot social distance from staff and clients other than the client they signed-in to visit. The facility also **recommends** maintaining 6 feet social distance from the client being visited.
11. Physical Contact is Not Recommended: Due to the risk of exposure, holding hands, kissing and other forms of physical contact are not recommended during visits.
12. If the county transmission rate is substantial or high, the facility will offer COVID-19 testing to unvaccinated visitors. Neither testing nor vaccination are required as a condition of visitation.
 - The Administrator or designee will check the county transmission rate every other week.

13. Regional ombudsman will have access to clients for visits.
14. The Administrator, or designee, will communicate with clients, families, and visitors regarding policy and procedure changes and/or COVID-19 status in the building.
