

# 2017 Level One Heart Attack Program Outcome Report

VOLUME 11 | NUMBER 1 | 2018

Level One Heart Attack Program interventional therapies are available 24 hours a day, 365 days a year.

## INNOVATIVE LEVEL ONE HEART ATTACK PROGRAM: NO PATIENT EXCLUDED FROM TREATMENT\*

Since implementing the Level One Heart Attack Program in March 2003, Minneapolis Heart Institute® at Abbott Northwestern Hospital has treated 5,635 patients with Level One STEMI. This program, which was the first of its kind in the United States to coordinate community emergency departments

with trained emergency transportation professionals and an expert angioplasty team, is available 24/7. When compared to benchmarks, the Level One program shows a significant reduction in mortality rates.

\*No patients excluded based on age, cardiogenic shock, cardiac arrest, comorbidity, etc.
