

Allina Health statement on Doctors Council SEIU Informational Picketing

May 28, 2025

Allina Health deeply values the dedication of our care team members who provide exceptional care to our patients and the communities we serve. There will be no disruption in care during these informational pickets.

We continue to negotiate in good faith with Doctors Council SEIU and seek to reach responsible agreements that maintain competitive pay and benefits for our providers while ensuring that we can sustain our caring mission long-term. At a time when we are facing significant uncertainty from rising costs, declining reimbursements and potentially devastating cuts to critical programs like Medicaid, we remain focused on reaching agreements that ensure we can maintain access to the high-quality care people depend on.
