Allina Health

Allina Health statement on MNA Informational Picketing

May 29, 2025

Allina Health values the dedication of our care team members who provide exceptional care to our communities. The Minnesota Nurses Association's (MNA) informational picketing is not a strike and will not disrupt patient care. Now, more than ever, negotiations must reflect the reality of rising costs, declining reimbursements and uncertainty around programs like Medicaid. We remain focused on a responsible contract agreement that ensures we can maintain access to care and the high-quality services people depend on.
