

## **Allina Health statement on Doctors Council SEIU Strike Authorization Vote**

**June 30, 2025**

Allina Health is disappointed that Doctors Council SEIU voted to authorize a strike in primary and urgent care. This does not mean a strike will occur.

We have made substantial progress in resolving the majority of issues through negotiations. However, we have not been able to reach an agreement on pay and benefits because the union is seeking proposals that represent double-digit percentage increases.

At a time when Congress is voting on significant cuts to Medicaid and Minnesota health care systems face major financial challenges, a strike would not benefit anyone. Both Allina Health and the union have a responsibility to work toward a fair and sustainable contract that ensures care remains affordable and accessible to the patients and communities we serve.

We remain committed to offering our providers market-competitive compensation packages that fairly reflect the nature of their work.
