

How to Collect a Sample for a Urine Culture

General Information

Read all the instructions before collecting a urine sample. It's important to follow the instructions so the sample is collected the right way. This will help your test results be correct.

Before you get started, gather your supplies:

- collection cup
- towelettes or cotton balls
- soap.

Before You Collect a Sample

For Men

- Clean the head of the penis with wet, soapy towelettes or cotton balls.
- If you are not circumcised, pull back your foreskin and cleanse.
- Rinse the cleansed area with a new towelette or cotton ball that is wet with plain water.
- Remove the lid from the collection container. Be careful not to touch the inside of the lid or the inside of the container.
