

Courage Kenny Ski & Snowboard

Safety Procedures

Safety is a primary concern of Courage Kenny Rehabilitation Institute. Each instructor and any other contributor to the program is asked to follow and to help enforce the safety regulations, rules and policies adopted by Courage Kenny Ski and Snowboard Program. It is imperative that all instructors conform to current Courage Kenny Ski and Snowboard Safety procedures, in order to protect ourselves, our students, and our program for years to come.

Helmets

Helmets are required for all participants, volunteers, and instructors who are registered with Courage Kenny and skiing/riding on the hill.

Terrain Park/Pipe

- Going into Park and Pipe areas is permitted per the posted Park & Pipe Guidelines, with an instructor who has been approved by the Program Coordinator.
- Bi skis, Mono-skis and other pieces of sit down equipment are NOT permitted in the park area as it carries an unnecessary and inherent risk of damage to both persons and equipment.

Retention Belts

- Retention belts to be referred to as “Black Belts,” will be used on the chairlift for all students who have had a seizure within the last 5 years. If a student has been stable, with or without medication and without occurrence of a seizures for at least 5 years, a “black belt” is not required, but is still recommended.
- Retention belts are also recommended for students that are fidgety and are at risk of falling off the chairlift.

Bibs

Fluorescent bibs are required for Visually Impaired and Hard of Hearing/Deaf participants.

Fixed Outriggers

When using equipment with removable fixed outriggers, both fixed outriggers must be removed prior to loading the chairlift and remain off for the duration of the entire chairlift ride. This is to prevent a student from skiing unattached to a ski instructor without being able to arrest themselves while unloading the lift.

Retention/Safety Straps

- Retention straps will be used on all chairlifts for all equipment heavier than an outrigger. In any situation involving tethering, or assisting (seat assist or bucketing) with any participant unable, for any reason, to self-arrest (resulting from equipment design or ability), a tether must be affixed to the instructor with a self-tightening 'girth hitch' knot to the instructor's skin on the wrist or elbow.
- The approved ways to tie into any piece of equipment is as follows;
 - Two single tethers both girth hitched to each wrist at the skin.
 - A "horseshoe tether" with one wrist girth hitched to skin.
 - A "horseshoe tether" with one wrist girth hitched to skin, and a harness or swami-belt with a daisy chain clipped to the main tether.

Incident Reports

Any incident to either volunteers, participants or instructors that requires medical assistance or first response should be reported to your site coordinator immediately. ***All incidents (even if no medical attention is needed) must be reported to your site coordinator.*** Your Site Coordinator will fill out the appropriate documentation and notify the Program Coordinator.

Emergency Response

In the event of an emergency:

1. Establish scene safety
2. Ask those involved if they are ok? Do NOT claim any responsibility for incident.
3. Call Ski Patrol
4. Keep the injured party comfortable without moving them.
5. Notify the Site Coordinator ASAP (as soon as possible).

If instructors have questions or concerns regarding safety, they should not hesitate to bring them to the attention of the Program Coordinator or Site Coordinator in an appropriate place and time.

Communication

- Good communication skills amongst the teaching team and participant.
- Communicate with parent/guardian on a weekly basis.
- If you can't attend your scheduled lesson call the Ski Hotline.
 - Metro Ski Hotline: 612-775-2282
 - Northland Ski Hotline: 218-726-4834 Ext 1

Responsibility Code: Know the 7 responsibilities codes of conduct

- Always stay in control, and be able to stop or avoid other people or objects.
- People ahead of you have the right of way. It is your responsibility to avoid them.
- You must not stop where you obstruct a trail, or are not visible from above.
- Whenever starting downhill or merging into a trail, look uphill and yield to others.

- Always use devices to help prevent runaway equipment.
- Observe all posted signs and warnings. Keep off closed trails and out of closed areas.
- Prior to using any lift, you must have the knowledge and ability to load, ride and unload safely.

Chair Lift Procedures

Before you get to the lift

- Review load & unload procedures. Practice as needed outside of the lift line.
- Remove any equipment that may impede your lifting abilities or safety (e.g., fixed riggers, or sometimes tethers)
- Know the lift sign language: **keep it moving** (finger moving in a circular motion); **slow down** (thumb down); **stop** (cut sign across the throat)
- Know and be able to explain the evacuation procedure
- Know your lift and be sure your co-instructor and guest know:
 - ✓ Can it be slowed at the bottom and/or the top?
 - ✓ Where do you wait in line?
 - ✓ Where do you position yourself to get on the lift?

If a problem occurs

- Don't panic
- Do not load or unload if you are not totally prepared
- Alert lift operator with any means possible (whistle, clap hands, yell, etc.)

Evacuation procedure

Ski Patrol has the ultimate responsibility for evacuation; offer suggestions as needed.

Loading procedure

1. Ask lift operator for a slow down if your student needs it (and if the lift can accommodate it).
2. Move to the load line and watch chair approach.
3. Count down and then sit or pull equipment up & back.
4. Make sure guest is seated as far back as possible.
5. Clip retention strap, if applicable. Co-instructor continues to hold on to guest or equipment.
6. Lower bar.

Unloading procedure

1. During the lift ride, review what will happen during unload. Remind co-instructor to hold onto guest or equipment while you unclip retention strap.
2. At appropriate distance (1-2 lift towers from top), unclip retention strap and hold it in your hand or clip it to the equipment.
3. Lift bar as you near the unloading load zone.
4. Count down and then stand up or lift equipment off the chair.
5. Assist student as necessary to make a straight run off the chair and then turn safely to a stop.

Adjust equipment as necessary so you may safely ski or snowboard

COMMUNICATION:

- Good communication skills amongst the teaching team and participant.
- Communicate with parent/guardian on a weekly basis.
- If you can't attend your scheduled lesson call the Ski Hotline.
 - Metro Ski Hotline: 612-775-2282
 - Northland Ski Hotline: 218-726-4834 Ext 1
- Subscribe to REMIND text to get text messages if we have to cancel
To subtribe, text the class code (the code listed below) to: 81010
 - Afton Saturdays: @aftonsat
 - Welch Sundays: @welchsun
 - Hyland Sundays: @hylandsun
 - Trollhaugen Sundays: @trollsun
