

Pulmonary Rehabilitation Program

Pulmonary rehabilitation is a service designed for those who experience lung problems such as:

- asthma
- bronchiectasis
- chronic bronchitis
- Chronic Obstructive Pulmonary Disease (COPD)
- emphysema
- interstitial lung disease
- lung cancer and lung cancer surgery
- lung volume reduction surgery before and after lung transplant
- pulmonary fibrosis
- pulmonary hypertension
- sarcoidosis.

Educational topics include:

- medications, including drug interaction, using an inhaler and self-care techniques
- understanding and using oxygen therapy
- diet, nutrition and weight management
- breathing retraining and strategies for managing breathing problems
- importance of exercise
- symptom assessment and knowledge about when to seek medical treatment
- community resources
- stress management.

Benefits include:

- develop a self-management strategy, including tools to better manage anxiety and depression
- promote behavioral change in everyday life
- decrease symptoms of disease
- promote ability to function better in daily life
- help increase ability to exercise
- promote smoking cessation and good nutrition
- help prevent hospital readmissions.

CLASS DETAILS:

A physician referral is required. Depending on your diagnosis, you may also require a pulmonary function test. We encourage you to ask for these details when you call to register. There may be out-of-pocket costs for the program sessions. It's recommended you call your insurance company and ask if "outpatient respiratory therapy/pulmonary rehabilitation" is covered by your policy.
